# FAQS

**Will my property management website be mobile-responsive?** Yes, your property management websites will be fully responsive, ensuring they look and function seamlessly on desktops, laptops, tablets, and mobile devices.

**How long will it take to complete my property management website?** Yes, the timeline for your property management website completion depends on the scope of the project and the requirements. Typically, I aim to deliver the initial draft within [insert timeframe] and make revisions based on your feedback.

**Can you assist with search engine optimization (SEO) for my property management website?**Yes, I can optimize your property management website for search engines by implementing on-page SEO techniques, including keyword research, meta tags, and content optimization. I can also provide guidance on off-page SEO strategies.

**Will I have access to edit my property management website content myself?** Yes, I can provide you with access to a user-friendly content management system (CMS) such as WordPress, allowing you to update and edit your property managment website content independently.

**Can you integrate property management software or booking systems into the website?** Yes, I can integrate popular property management software such as Yardi, Cozy, or TenantCloud into your website to streamline processes like rental listings, tenant applications, and rent
payments.

**REQUIREMENT**
**You will be needing domain and hosting**
**You need to add me to your CMS platform**
